## Why Do People Pay Taxes? Joshua Blank Professor of Tax Practice and Faculty Director of the Graduate Tax Program NYU School of Law **NYU Law Reunion Weekend** May 2, 2015

### vertical equity

The concept that people in different income groups should pay different rates of taxes or different percentages of their incomes as taxes. "Unequals should be taxed unequally."

### voluntary compliance

A system of compliance that relies on individual citizens to report their income freely and voluntarily, calculate their tax liability correctly, and file a tax return on time.

### Volunteer Income Tax Assistance (VITA)

This provides free income tax return preparation for certain taxpayers. The VITA program assists taxpayers who have limited or moderate incomes, have limited English skills, or are elderly or disabled. Many VITA sites offer electronic preparation and transmission of income tax returns.

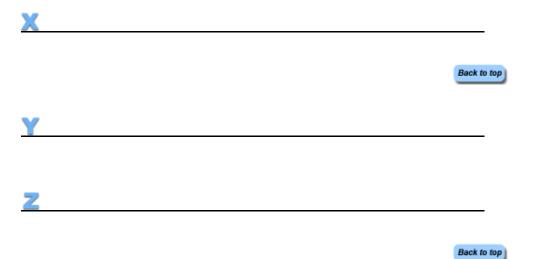

### wages

Compensation received by employees for services performed. Usually, wages are computed by multiplying an hourly pay rate by the number of hours worked.

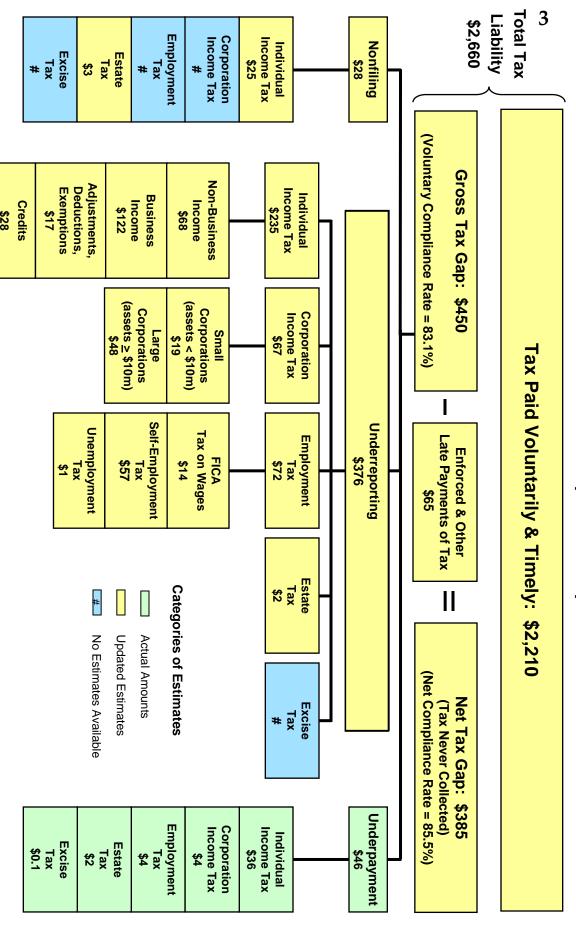

### withholding ("pay-as-you-earn" taxation)

Money, for example, that employers withhold from employees paychecks. This money is deposited for the government. (It will be credited against the employees' tax liability when they file their returns.) Employers withhold money for federal income taxes, Social Security taxes and state and local income taxes in some states and localities.

### Tax protester pays \$12,000 bill in coins, \$1 bills

Published: 08.15.2007, The Associated Press

MUNCIE, Ind. - A landlord said he wanted people to see the pain of his property tax bill when he hauled \$12,656.07 in coins and \$1 bills to the county treasurer's office.

Cary Malchow said the heavy load left him "out of breath" but it was worth watching three cashiers working overtime and guarded by sheriff's deputies on Monday to count every last cent of the semi-annual payment for his home, business and rental properties.

"I did it so people can physically see what \$12,000 is," said Malchow, who has staged other recent protests to draw attention to Indiana's property tax increases.

It took 75 minutes to count out the cash, said Delaware County Treasurer Warren Beebe.

"They were fast, they were hustling. They're used to counting money, but of course that left other people standing in line. It was an awkward situation," Beebe said Tuesday.

Malchow's protest prevented the office from making its daily bank deposit, costing the county an estimated \$1,135.90 in interest that would have otherwise accrued overnight, Beebe said.

### When Is Tax Enforcement Publicized?

windows we studied, versus the rest of the year, along with the magnitude of this difference and its statistical significance:

TABLE 1. COMPARISON OF TAX ENFORCEMENT PRESS RELEASES ISSUED IN TIME WINDOWS VS. REST OF YEAR (2003–2009)

	AVERAGE NUMBER OF PRESS RELEASES PER WEEK			PROBABILITY THAT DIFFERENCE IS RANDOM			
TIME WINDOW	REST OF YEAR	PERIOD BEFORE TAX DAY	% More	P-VALUE	CHANCE (1 IN X)		
FEB 1ST TO TAX DAY	2.0	3.1	+58%	.0000032	311,656		
Mar 1st to Tax Day	2.0	3.5	+71%	.0000030	333,427		
APR 1ST TO TAX DAY	2.1	4.8	+128%	.0000013	791,637		

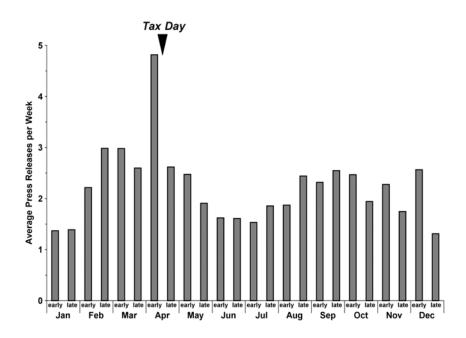

The chart below provides a graphic illustration of the average frequency of tax enforcement press releases issued throughout the year during 2003 through 2009. The chart reveals a striking increase in the frequency of press releases issued during the two weeks prior to Tax Day. We designated April 1 to Tax Day (usually April 15) as early April, and the day after Tax Day until April 30 as late April. For all other months, we divided the number of workdays in that month in half; if a month had an odd number of workdays, we made the early part of that month one day longer than the late part. For each halfmonth, we aggregated across the seven years of the sample to calculate the number of press releases per workday in that half-month. Based on the concept of a five-day workweek, we then multiplied this per-workday number by five to compute the average number of press releases per week, as shown in the figure below.

Blank.formatted.4.doc 8/30/2010 11:58 AM

Virginia Tax Review

[Vol. 30:1

FIGURE 1. FREQUENCY OF TAX ENFORCEMENT PRESS RELEASES (2003–2009)

Last, we performed the same analysis described above, but limited our sample of press releases to only those press releases that involved criminal tax enforcement actions, such as indictments or prison sentences. We found that the timing of the government's issuance of criminal tax enforcement press releases revealed the same pattern as what we observed when we performed our analysis for all press releases in our sample. As a result, we have reported the overall results for all press releases in our sample.

### 4. Individual Years

We found that the pattern described above occurred throughout the seven years that we studied. To illustrate this observation, the table below presents the difference between the average number of tax enforcement press releases issued per week during the April 1 to Tax Day window and the number issued per week during the rest of the

18

<sup>&</sup>lt;sup>61</sup> In other words, when we segregated the press releases that described criminal tax enforcement actions, we observed a striking and statistically significant increase in the frequency of these press releases issued during each of the three time windows prior to Tax Day, versus the rest of the year.
